

# Application Note: 3048

How to turn the indoor unit fan off when set point  
is met

# Introduction

This application note is to help configure a M-Series or P-Series indoor unit to have the indoor unit fan to turn off when the room temperature is the same as the set point. This is also called turning the fan off during Cooling or Heating thermal off states. There are three methods to achieve this:

1. For most indoor units, function codes 25 (Heating) and 27 (Cooling) need to be change via a remote controller
2. For only the M-series ductless units, jumpers (or resistors) have to be physically cut with cutting pliers.
3. Using the Thermostat Interface

Below is a list of indoor units that are compatible with each method.

## Method 1: Indoor Units that use function codes:

- | M-Series: | P-Series: |
|-----------|-----------|
| • SVZ/MVZ | • PKA     |
| • SLZ     | • PCA     |
| • SEZ     | • PLA     |
|           | • PEAD    |
|           | • PVA     |

## Remote controllers that can change indoor unit function codes:

- kumo cloud®
- MHK1
- Touch MA (PAR-CT01MAU-SB)
- Wired MA (PAR-33MAA)
- Simple MA (PAC-YT53CRAU)

## Method 2: Indoor Units that cut jumpers/resisters:

- M-Series:
- MSZ (All wall mounts)
  - MFZ
  - MLZ

## Using the thermostat Interface to turn the fan off:

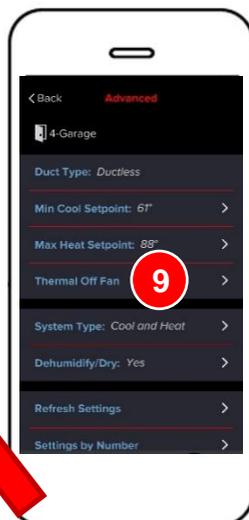

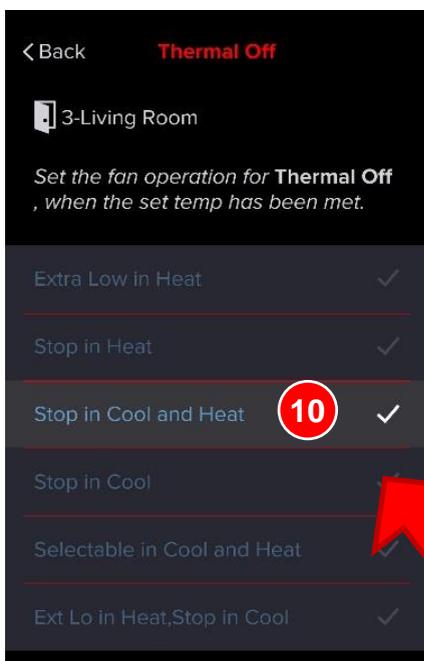

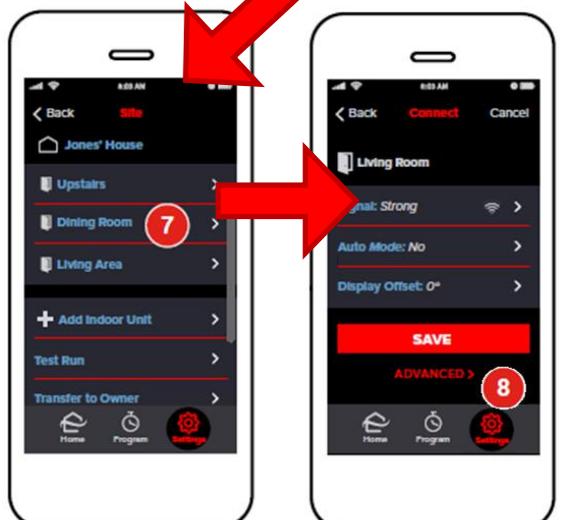

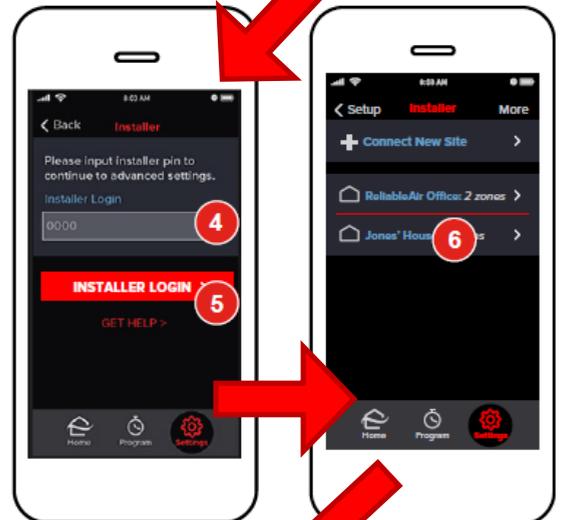

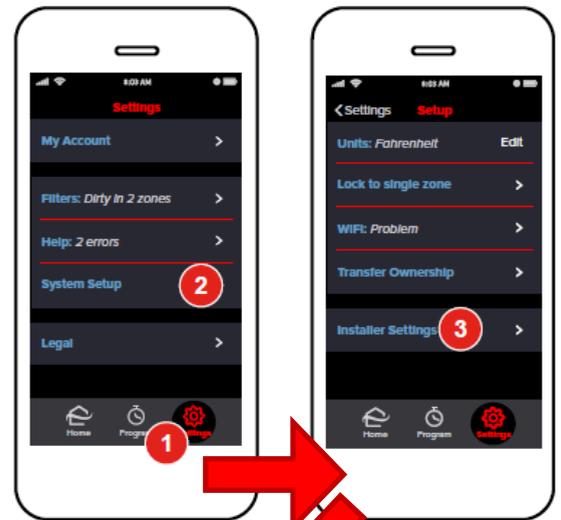

- Thermostat Interface (PAC-US444CN-1)

## APPLICATION Notes

# Kumo cloud®

Kumo cloud configuration requires a Wireless Interface and the kumo cloud app

1. Tap **Settings**
2. Tap **System Setup**
3. Tap **Installer Settings**
4. Enter **9999**
5. Tap **Installer Login**
6. Tap the name of the **Site**
7. Tap the name of the **Zone**
8. Tap **Advanced**
9. Select **Thermal OFF Fan**
10. Select the desired **Stop** function

# MHK1

1. Press and hold the **Fan** and **Up** button simultaneously to enter settings mode. (Figure 1).
2. “Wait” will be displayed up to 40 seconds.
3. Press the button that indicates **Next** or **Back** to reach the function setting. (Figure 2)
4. Press the **Up** and **Down** arrows to change the mode (number) of the function setting. (Figure 3)
5. Press **Done** when finished.

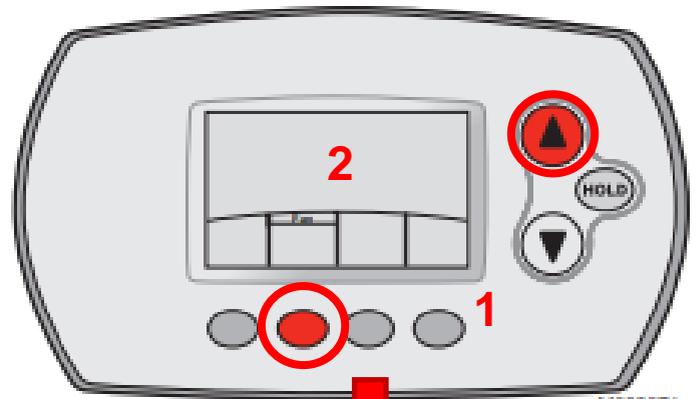

Figure 1

Figure 2

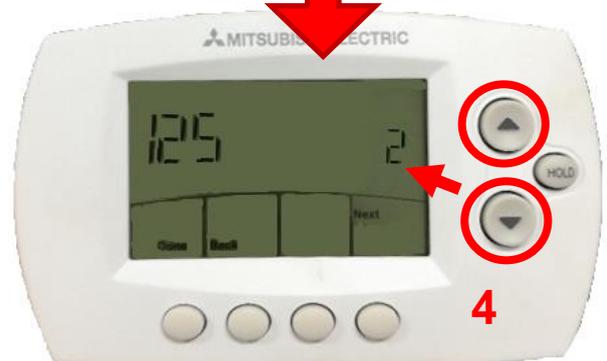

Figure 3

## Setting 125 Thermal OFF Fan (Heating)

1. Extra Low
2. **Stop**
3. Selectable Fan Speed

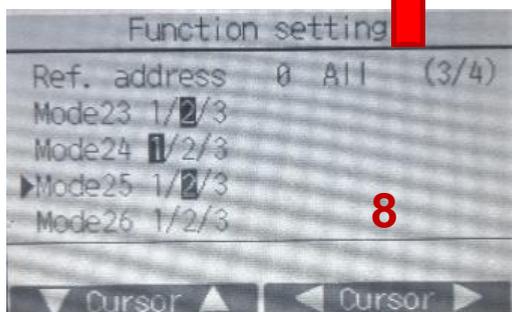

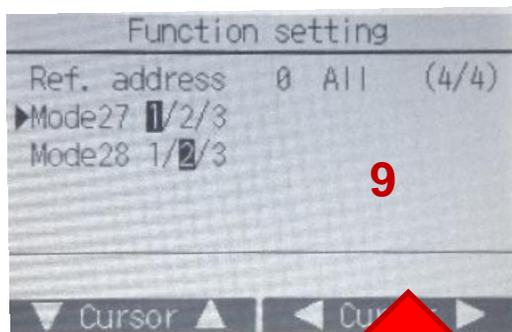

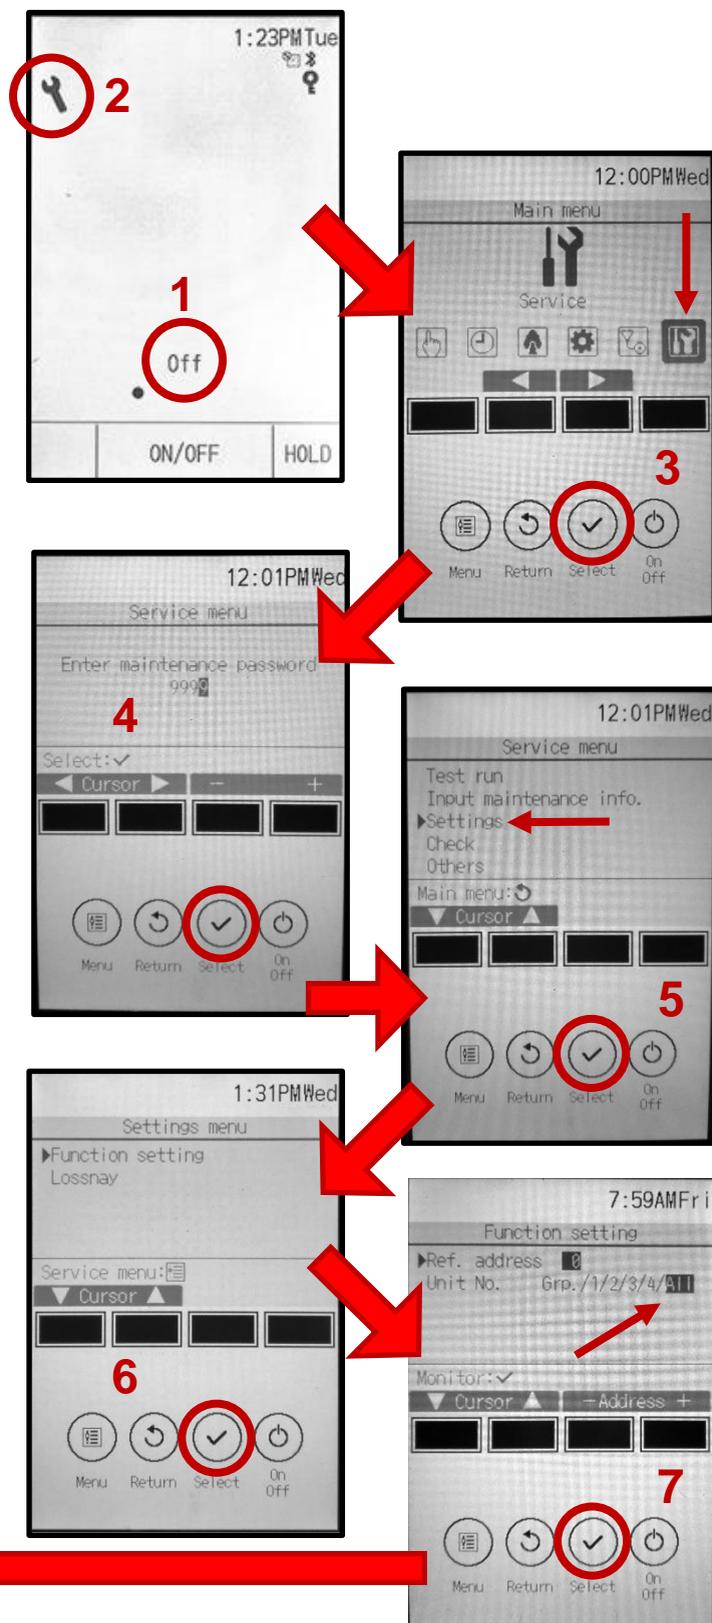

## Setting 127 Thermal OFF Fan (Cooling)

1. Selectable Fan Speed
2. **Stop**
3. Not Supported

## APPLICATION Notes

# Touch MA

1. Turn the controller **OFF**
2. Select the **wrench** icon
3. Scroll to the right and select **Service**
4. Enter the maintenance password **9999** and push "Select"
5. Scroll down and select **Settings**
6. Select **Function setting**
7. Leave "Ref. Address" at **0** then scroll down to "Unit No." and select **All**
8. Scroll down to **Mode 25** (heating) or **27** (cooling)
9. Select setting **2** for thermal off in either mode and push "Select" to save the settings

# Wired MA

1. Turn the controller **OFF**
2. Push the **Menu** button
3. Select the **Service** menu  
It is on the 3<sup>rd</sup> page which can be reached using the page button
4. Enter the password **9999** and push the select button
5. Scroll down and select **Function Setting**
6. Leave "Ref. Address" at **0** then scroll down to "Unit No." and select **All**
7. Scroll down to **Mode 25** or **27**
8. Select setting **2** for thermal off in either mode and push "Select" to save the settings

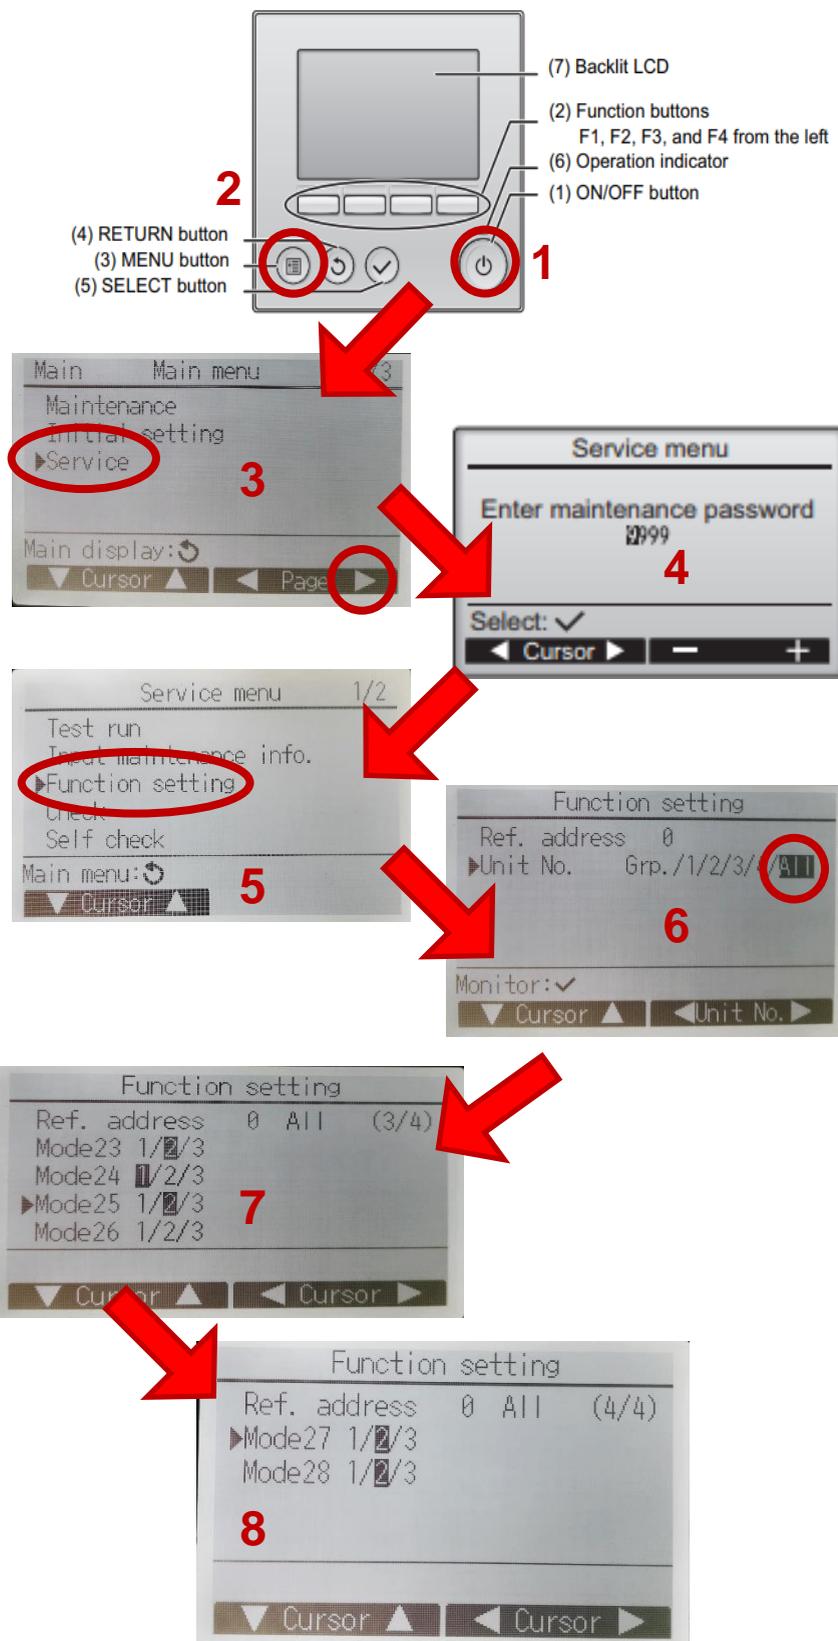

Toggle between settings by using the side arrows

## Setting 25 Thermal OFF Fan (Heating)

1. Extra Low
2. **Stop**
3. Selectable Fan Speed

## Setting 27 Thermal OFF Fan (Cooling)

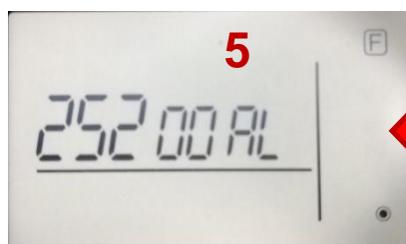

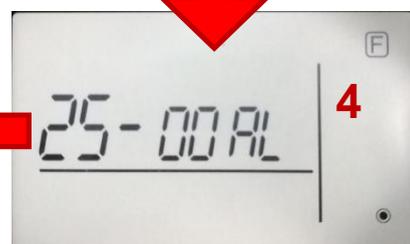

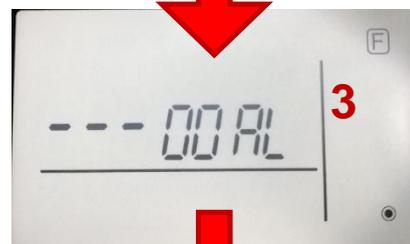

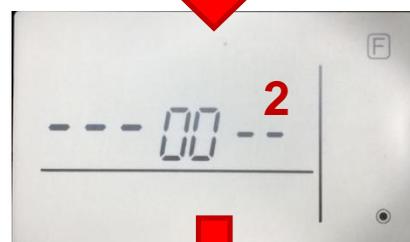

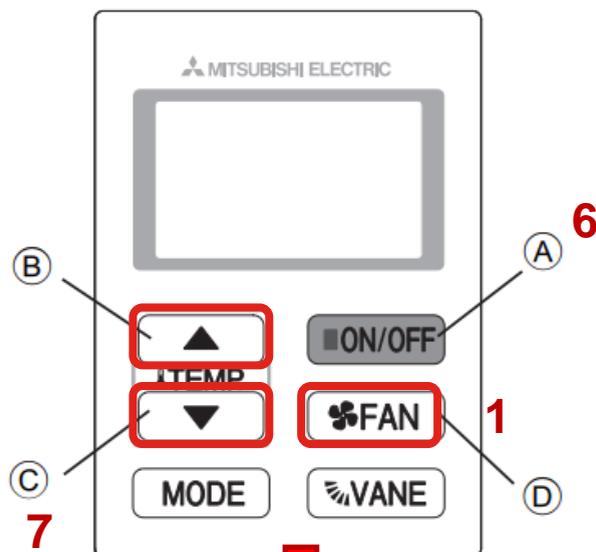

1. Selectable Fan Speed
2. **Stop**
3. Not Supported

# Simple MA

Make sure the unit is turned **OFF**

1. Press and hold the **B C** and **D** buttons simultaneously until the function settings screen appears
2. Press **B** once so that it displays **00** and then press **D**
3. Press **B** until you see **AL** and then press **A**
4. Press **B** until you reach function **25** (heating) or **27** (cooling) and then press **D**
5. Press **B** or **C** to change the setting number to **2** for thermal off in either mode
  1. Press **D** and repeat **Step 4** if you wish to make changes to both modes at the same time
6. Press **A** to save the settings
7. Press and hold the **B C** and **D** buttons simultaneously to exit the function settings screen

## APPLICATION Notes

Function Settings lists can be found in the outdoor unit service manuals:

<b>SUZ-KA Service Manual</b>		Mode No.	Setting No.	● : Initial setting (Factory setting)				Check

# Thermostat Interface

The Thermostat Interface can be configured to turn off the indoor unit fan OFF when the third party 24VAC thermostat senses the room temp has met the thermostat's set point.

The Thermostat Interface has two dipswitches SW1-1 & SW1-2 that need to be change from default OFF to ON to have a Delayed Off function set to 0 minutes. This will cause the system to turn OFF, which the indoor unit fan will also turn OFF, when the thermostat is satisfied.

## *Delayed Off*

SW1-1/2: After reaching thermostat set point, the unit will continue to run for a set period of time in order to improve efficiency. The period of time is set by adjusting SW1-1 and SW1-2 according to the following table:

SW1-1	SW1-2	Result
OFF	OFF	5 minutes (Default)
ON	OFF	10 minutes
OFF	ON	30 minutes
ON	ON	0 minutes
